

Making material pack

We have now learned to make a new block. We can do things a bit faster using pack making tool. One of such packs is material pack. A set of ore block, gem, tools, and armor for the given ore.

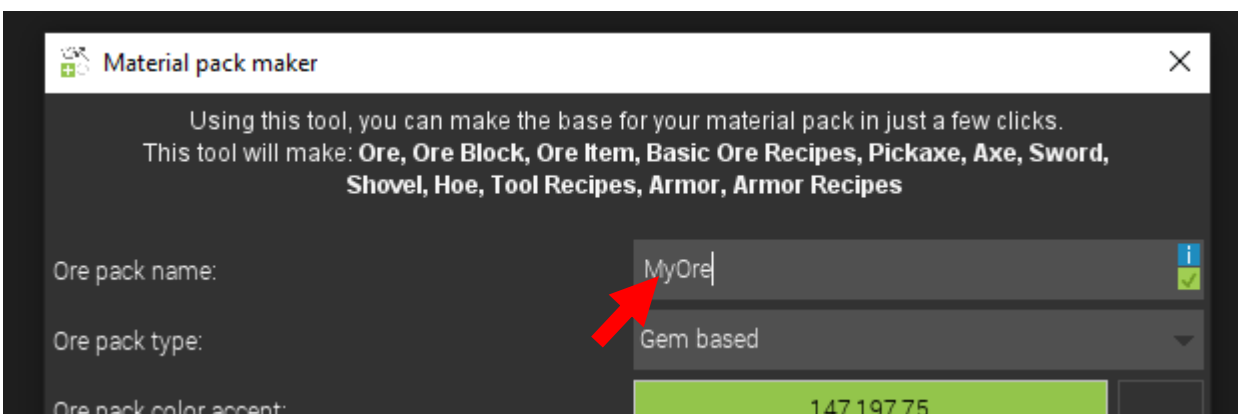

1. Opening material pack maker

To open material pack maker, click on the  button on the top-right part of the MCreator window.

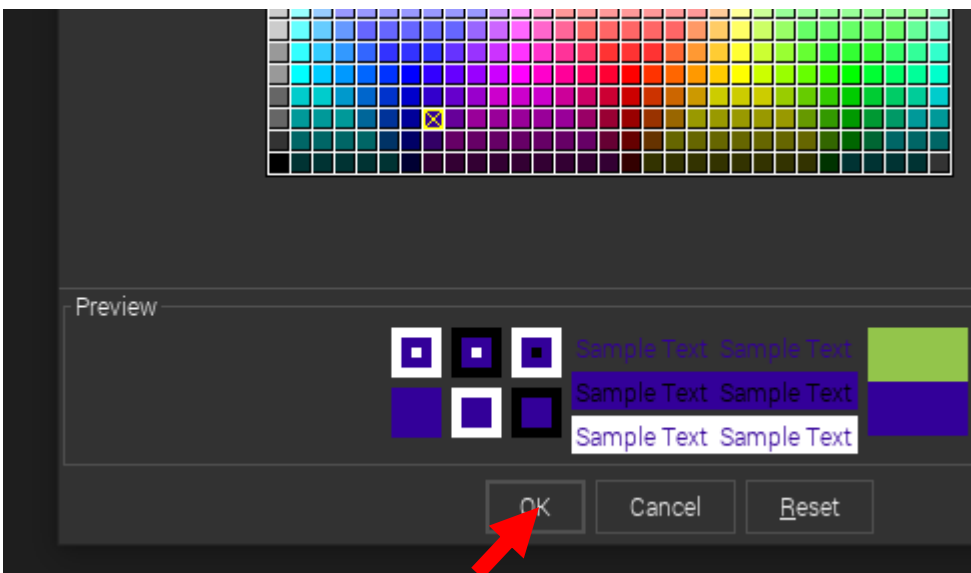

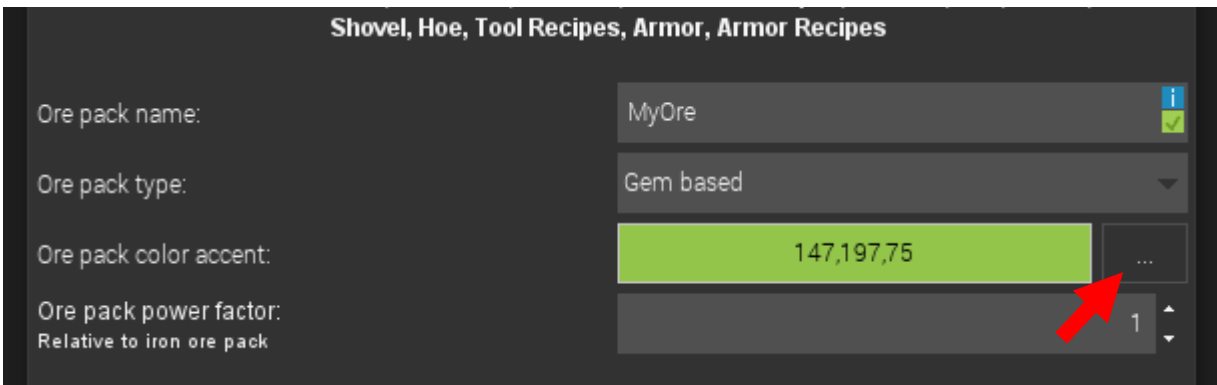

2. Making material pack

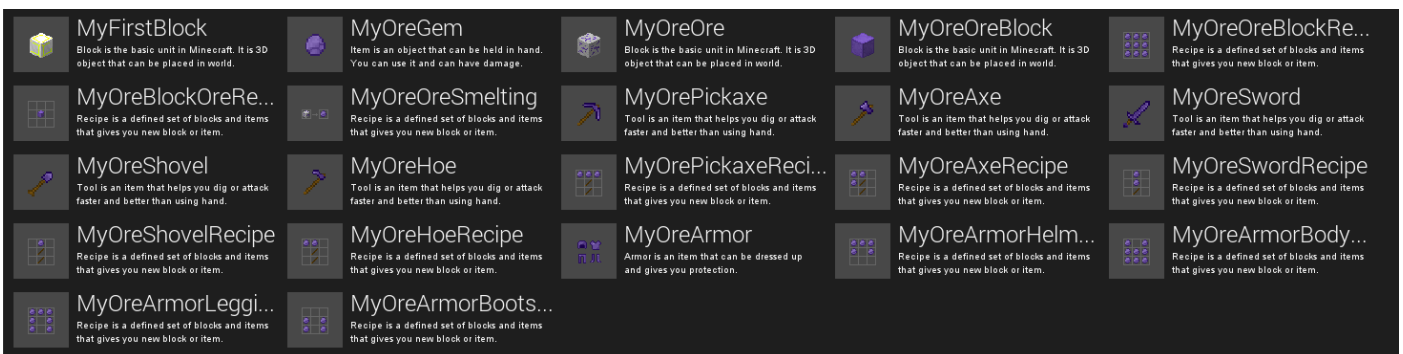

Material pack maker window will open. Enter ore pack name in the name field and select one of the types.

Then select color of your ore pack. To do this, click on the “...” button, select desired color and click OK.

Click “Create ore pack” button to make your ore pack. You will now see your ore pack created in the workspace.

3. Testing it out

Now we can test the ore pack out. To do this, run Minecraft, create new world, open it and find your newly made ore, gem, and tools in the creative mode item list.

4. Next steps

You have learned how to edit elements of your project previously. Use this knowledge to change parameters of some of the generated elements of your material pack. See what you can do 😊
