Tutorials

Crafting:

To enter the new dimension:

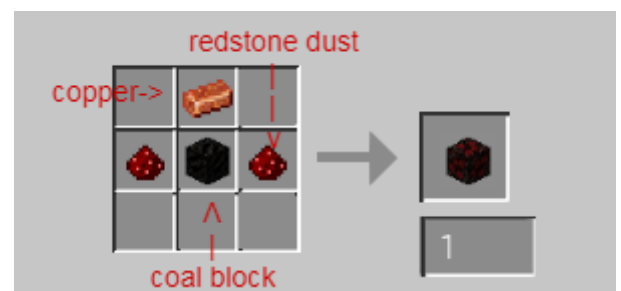

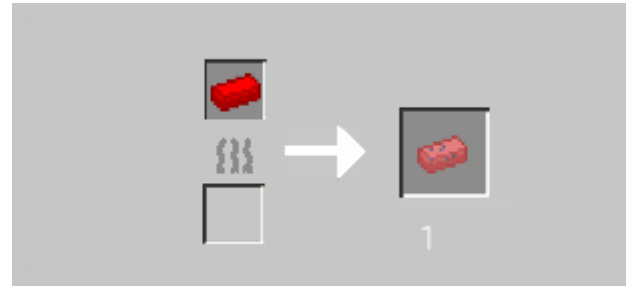

1st you need to craft red iron:

2nd you need to melt it
to make something like
flint and steel.

You if you use a stonecutter you
can transform the red iron
to iron.

3rd You need to craft soul coal.
(Something like obsidian)

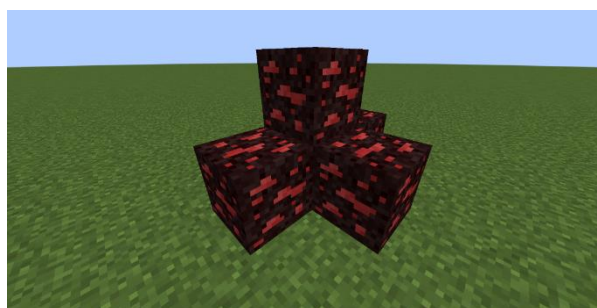

Now all you need to do is to make a portal like
the nether portal!

Craft amethyst armor:

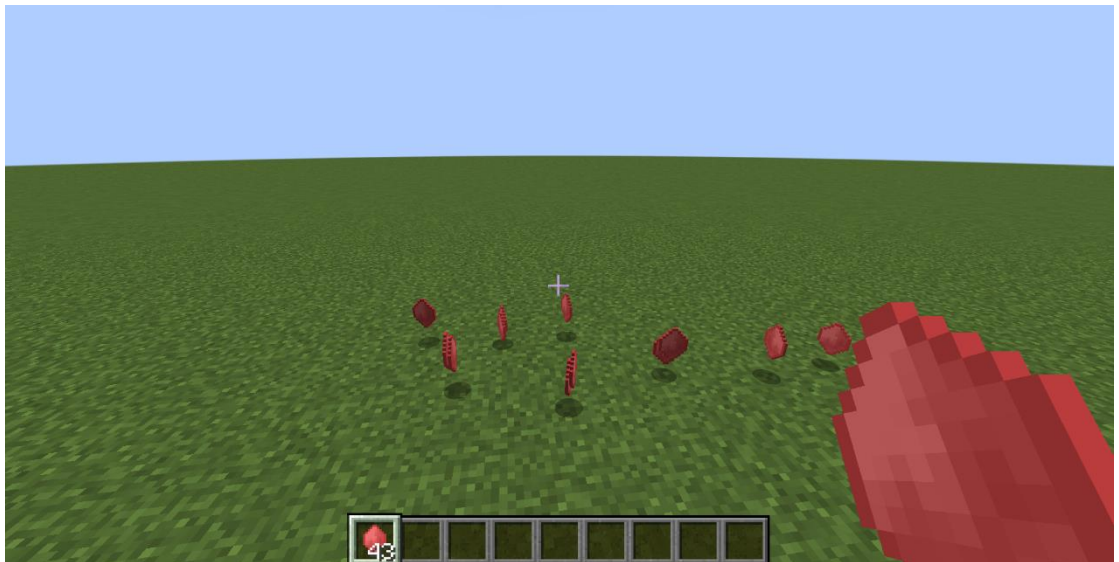

The only thing that you need to do is to use amethyst to make armor
and tools like shovels and helmets.

Reinforce amethyst armor:

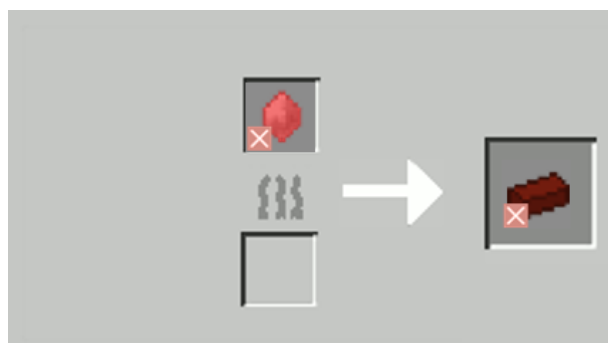

To reinforce amethyst armor, you need to use a red emerald. You can
find it very rare in the overworld (level -64/40) and rare in the new
dimension (Big red forest) level -64 / 50

This ore if it is mined with iron pickaxe or better (diamond, netherite, amethyst, and reinforced amethyst pickaxe) will drop a red emerald

Now if you melt this you are going to get a red emerald ingot that can reinforce an amethyst tool or armor:

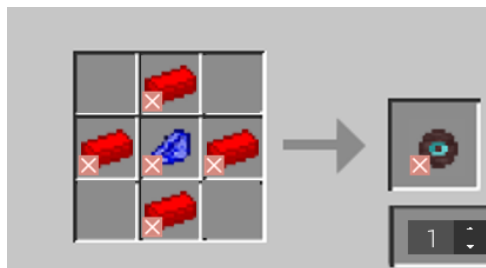

Note: the reinforced amethyst armor and tools are better than netherite. You can repair them with a red emerald ingot.

You can also get them by going to the big red forest (new dimension), find a red mansion and kill the mob that they are there. They will drop you a red emerald drop, and with 9 you can craft a red emerald.

Dimension:

- This dimension is very good for diamond mining. You can find diamonds in any level.
- The water will cause nausea poison and weakness. To avoid this you need to have in your right/left hand a red ring. This will give you underwater breathing and night vision when you touch the water in the big red forest. It can be crafted like this with red iron and lapis lazuli:
